| Product Description        | MIV-6R is a small-molecule inhibitor of menin-mixed lineage leukemia (MLL) interaction which closely mimics the natural protein-protein interaction, and thus a potential therapeutic for acute leukemia. Molecular Formula: C27H35N3O Molecular Weight: 4... |
| Molecular Weight           | 417.59                                                                                                                                                                                                                                                        |
