| Product Description        | N-(2-Chloro-1-oxopropyl)glycine (Tiopronin Impuriy 1) is an impurity of Tiopronin (T444782), which is used as an antidote against heavy metal poisoning. Molecular Formula: C <sub>5</sub> H <sub>8</sub> ClNO <sub>3</sub> Molecular Weight: 165.57 Storage and Stability: Store at -20C. For m... |
| Molecular Weight           | 165.57                                                                                                                                                                                                                                                                                              |
