| Category                   | Biochemikalien                                                                                                                                                                                                                                                                                      |
| Product Description        | N-Boc-3-iodo-L-alanine Benzyl Ester is used as a reactant in the synthesis of the angiotensin-converting enzyme Inhibitors (-)-A58365A and (-)-A58365B lactams. Molecular Formula: C <sub>15</sub> H <sub>20</sub> INO <sub>4</sub> Molecular Weight: 405.23 Storage and Stability: Store at -20... |
| Molecular Weight           | 405.23                                                                                                                                                                                                                                                                                              |
