| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | EEF1E1, also known as eukaryotic translation elongation factor 1 epsilon-1, shares sequence similarity with the amino-terminal ends of the Beta and Gamma subunits of EF-1. By specifically interacting with MetRS, this protein binds to a macromolecular... |
| Molecular Weight           | 21.9                                                                                                                                                                                                                                                          |
| NCBI                       | <a href="#">004271</a>                                                                                                                                                                                                                                        |
| Purity                     | 95% (SDS-PAGE)                                                                                                                                                                                                                                                |
| Form                       | Supplied as a liquid in 20mM Tris-HCl, pH 8.0, 0.1M sodium chloride, 1mM DTT, 20% glycerol.                                                                                                                                                                   |
