| Category                   | Biochemikalien                                                                                                                                                                                                                                                                                                   |
| Product Description        | N2-Trityl Olmesartan Acid is an intermediate in the synthesis of Olmesartan medoxomil (O550000) related compounds. Molecular Formula: C <sub>43</sub> H <sub>40</sub> N <sub>6</sub> O <sub>3</sub> Solubility: DMSO, Methanol Molecular Weight: 688.82 Storage and Stability: Store at -20C. For maximum rec... |
| Molecular Weight           | 688.82                                                                                                                                                                                                                                                                                                           |
| Form                       | Supplied as a White Solid                                                                                                                                                                                                                                                                                        |
