| Category                   | Biochemikalien                                                                                                                                                                                                                                                                         |
| Product Description        | Potassium bicarbonate is a catalyst in synthetic fiber polymerization and olefin dehydrogenation. Molecular Formula: CH <sub>2</sub> KO <sub>3</sub> Molecular Weight: 101.12 Storage and Stability: Store at -20C. For maximum recovery of product, centrifuge the original vial p... |
| Molecular Weight           | 101.12                                                                                                                                                                                                                                                                                 |
