| Product Description        | 1-Cyclopropyl-2-(2-fluorophenyl)-2-hydroxy-ethanone is a useful synthetic intermediate in the synthesis of Prasugrel (HCl), an antiplatelet agent. Molecular Formula: C <sub>11</sub> H <sub>11</sub> FO <sub>2</sub> Solubility: Chloroform (Slightly), DMSO (Slightly), Ethyl Acetate (Slightl... |
| Molecular Weight           | 194.2                                                                                                                                                                                                                                                                                               |
| Form                       | Supplied as a Clear Pale Yellow to Yellow Oil                                                                                                                                                                                                                                                       |
