| Product Description        | 3-Acetyl-2(1H)-pyridone is a general chemical reagent used in the synthesis of 2,3-disubstituted pyridines. Also used in the synthesis of quinolones Molecular Formula: C <sub>7</sub> H <sub>7</sub> NO <sub>2</sub> Molecular Weight: 137.13999999999999 Storage and Stability: Store at -20C.... |
| Molecular Weight           | 137.14                                                                                                                                                                                                                                                                                              |
