| Product Description        | 5-Amino-2-bromopyrimidine is a reagent used in the synthesis in a bioavailable PPARα antagonist used in the treatment of metabolic syndrome. Molecular Formula: C <sub>4</sub> H <sub>4</sub> BrN <sub>3</sub> Molecular Weight: 174 Storage and Stability: Store at -20°C. For maximum recovery ... |
| Molecular Weight           | 174                                                                                                                                                                                                                                                                                                  |
