| Category                   | Biochemikalien                                                                                                                                                                                                                                                                                       |
| Product Description        | 5-Benzyl-1H-indazol-3-ol is an intermediate in the synthesis of Benzydamine hydrochloride (B209950) related impurities. Molecular Formula: C <sub>14</sub> H <sub>12</sub> N <sub>2</sub> O Solubility: DMSO, Methanol Molecular Weight: 224.26 Storage and Stability: Store at -20C. For maximum... |
| Molecular Weight           | 224.26                                                                                                                                                                                                                                                                                               |
| Form                       | Supplied as a Yellow Solid                                                                                                                                                                                                                                                                           |
