| Category                   | Biochemikalien                                                                                                                                                                                                                                                                                                    |
| Product Description        | 5-Methoxyisatoic Anhydride is a reagent in the preparation of <sup>18</sup> F-labeled radiotracers for GABAA receptor PET imaging. Molecular Formula: C <sub>9</sub> H <sub>7</sub> NO <sub>4</sub> Molecular Weight: 193.16 Storage and Stability: Store at -20C. For maximum recovery of product, centrifuge... |
| Molecular Weight           | 193.16                                                                                                                                                                                                                                                                                                            |
