| Category                   | Biochemikalien                                                                                                                                                                                                                                                                                                                |
| Product Description        | (6S)-6-Ethyl-1,4-bis[(1S)-1-(4-methoxyphenyl)ethyl]-2,5-piperazinedione-3,3,6-d3 is an intermediate in the synthesis of labelled L-2-Aminobutyric Acid-d1 (A602931). Molecular Formula: C <sub>24</sub> H <sub>27</sub> D <sub>3</sub> N <sub>2</sub> O <sub>4</sub> Solubility: DCM, Ethyl Acetate Molecular Weight: 413.... |
| Molecular Weight           | 413.52                                                                                                                                                                                                                                                                                                                        |
| Form                       | Supplied as a Light Yellow Oil                                                                                                                                                                                                                                                                                                |
| CAS Number                 | [1246496-59-2]                                                                                                                                                                                                                                                                                                                |
