| Category                   | Biochemikalien                                                                                                                                                                                                                                                |
| Product Description        | UCN-02 is isolated as a minor co-metabolite of high producing staurosporine strains of selected actinomycetes. Although less selective than its isomer UCN-01, UCN-02 exhibits comparable activity and probably acts by similar mechanisms. Purity: >95% b... |
