| Manufacturer               | US Biological                                                                                                                                                                                                                                                 |
| Category                   | Biochemikalien                                                                                                                                                                                                                                                |
| Product Description        | Labelled Benazepril, which is used as an antihypertensive. Source: Synthetic Melting Point: 49-51C Solubility: DMSO, Ethanol, Methanol Atmosphere: Inert Gas Specific Rotation (c=0.2, Ethanol): -183 Method for Determining Identity: Proton NMR Spectrom... |
| Molecular Weight           | 429.52                                                                                                                                                                                                                                                        |
| Purity                     | ~90%                                                                                                                                                                                                                                                          |
| Form                       | Supplied as an off-white low melting solid.                                                                                                                                                                                                                   |
| CAS Number                 | [1279200-03-1]                                                                                                                                                                                                                                                |
