| Category                   | Biochemikalien                                                                                                                                                                                                                                                      |
| Product Description        | Used as an antipsychotic. Benzothiazepine with mixed serotonin and dopamine receptor antagonistic properties. Melting Point: 167-169C<br>Solubility: Methanol Method for Determining Identity:Proton NMR<br>Spectroscopic Analysis TLC Conditions: SiO2: Chlorof... |
| Molecular Weight           | 883.1                                                                                                                                                                                                                                                               |
| Purity                     | ~90%                                                                                                                                                                                                                                                                |
| Form                       | Supplied as a white solid.                                                                                                                                                                                                                                          |
