Application Notes	Abbkine CheKine(TM) Micro Coenzyme 1 NAD(H) Assay Kit provides a convenient tool for sensitive detection of the NAD and NADH, and their ratio in various tissues and subcellular organelles. This Kit is based on enzyme cycling reaction (It does not recognize NADP+/NADPH), in which the formed NADH reduces a formazan (MTT) reagent. The intensity of the reduced product color, measured at OD450 nm, is proportionate to the NAD+ /NADH concentration in the sample.
