Human Putative serine protease 29 (PRSS29P) ELISA Kit ASC-KTE61105

| | |
|----------------------------|--|
| Article Name | Human Putative serine protease 29 (PRSS29P) ELISA Kit |
| Biozol Catalog Number | ASC-KTE61105 |
| Supplier Catalog Number | KTE61105 |
| Alternative Catalog Number | ASC-KTE61105-48, ASC-KTE61105-96 |
| Manufacturer | Abbkine Scientific |
| Category | Kits/Assays |
| Application | ELISA |
| Species Reactivity | Human |
| Product Description | This Human Putative serine protease 29 (PRSS29P) ELISA Kit employs a two-site sandwich ELISA to quantitate PRSS29P.... |
| Range | Please inquire |
| Sensitivity | Please inquire |
| Tag | PRSS29P |
| UniProt | A6NIE9 |
| Samples | Cell culture supernatantsSerumPlasmaOther biological fluids |

Application Notes

This Human Putative serine protease 29 (PRSS29P) ELISA Kit employs a two-site sandwich ELISA to quantitate PRSS29P in samples. An antibody specific for PRSS29P has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any PRSS29P present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for PRSS29P is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of PRSS29P bound in the initial step. The color development is stopped and the intensity of the color is measured.
