| Species Reactivity         | Mouse                                                                                                                                                                                                                                               |
| Immunogen                  | iiA partial length recombinant m TLR9 protein (amino acids 200-450) was used as the immunogen for this antibody.                                                                                                                                    |
| Product Description        | TLR9, a member of toll-like receptor family are central to the innate immunity by identifying pathogen associated molecular patterns (PAMPs). TLR9 identify unmethylated CpG dinucleotides present in bacterial DNA leading to NF-kB activation.... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                          |
