| Immunogen                  | Recombinant human LFA2 protein                                                                                                                                                                                                                                |
| Product Description        | CD2 interacts through its amino-terminal domain with the extracellular domain of CD58 (also designated CD2 ligand) to mediate cell adhesion. CD2/CD58 binding can enhance antigen-specific T cell activation. CD2 is a transmembrane glycoprotein that is ... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
