Application Notes	Fumarate hydratase-IN-1 is a pro-drug inhibitor of fumarate hydratase, an important enzyme in the tricarboxylic acid (TCA) cycle. This cell permeable compound is converted to the active carboxylic acid by intracellular esterases (K <sub>i</sub> = 4.5 μM for free acid). The ethyl ester displayed cell-growth inhibitory activity against several cancer lines under nutrient (glucose) deprived conditions with an average IC <sub>50</sub> = 2.2 μM.
