Application Notes	RECTAS, a pre-mRNA splice modulator (Rectifier of Aberrant Splicing), was discovered in a small molecule screen for compounds that rectify aberrant IKBKAP splicing in cells from patients with familial dysautonomia. RECTAS (2 mM) increased the expression of IKAP and restored tRNA modifications. ^{1,2} It directly interacts with CDC-like kinases enhancing SRSF6 phosphorylation. ² A combination treatment with RECTAS and phenylbutyric acid was shown to restore DJ-1 protein and mitochondrial dysfunction in Parkinsons disease models. ³
