| Product Description        | Ube2A is an E2 enzyme, which is part of the E1, E2, and E3 cascade responsible for ubiquitination of protein substrates. It shares 95% amino acid sequence identity with Ube2B. One function of Ube2A involves the formation of Ube2A/Rad18 (an E3 enzyme)... |
| Molecular Weight           | 17.1 kDa                                                                                                                                                                                                                                                      |
