| Conjugation                | Unconjugated                                                                                                                                                                                                                                                  |
| Product Description        | The activated kinase acts on a variety of targets. Phosphorylates ribosomal protein S6, histone H4 and myelin basic protein. Full length PAK 2 stimulates cell survival and cell growth. The process is, at least in part, mediated by phosphorylation and... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
| Molecular Weight           | Calculated MW: 58 kDa, Observed MW: 61 kDa                                                                                                                                                                                                                    |
