| Category                   | Biochemikalien                                                                                                                                                                                                                                                |
| Product Description        | Dibutyryl-cAMP is an analog of cyclic AMP that stimulates cAMP-dependent protein kinase. Synonyms: 4H-Furo[3,2-d]-1,3,2-dioxaphosphorin, Adenosine deriv., Bucladesine Sodium, Bucladesine Sodium Salt, DC 2797, Dibutyryl 3,5-Cyclic AMP Sodium Salt, Dib... |
| Molecular Weight           | 491.37                                                                                                                                                                                                                                                        |
| Purity                     | 95% (HPLC)                                                                                                                                                                                                                                                    |
| Form                       | Off-white to brown powder                                                                                                                                                                                                                                     |
