| Product Description        | 3-(Acetyloxy)-D-homo-17a-oxaandrost-5-en-17-one is an intermediate in the synthesis of Testolactone (T154800) derivatives with antineoplastic agent. Molecular Formula: C <sub>21</sub> H <sub>30</sub> O <sub>4</sub> Solubility: Chloroform, DCM Molecular Weight: 346.46 Storage and Stabilit... |
| Molecular Weight           | 346.46                                                                                                                                                                                                                                                                                              |
| Form                       | Supplied as a Yellow Solid                                                                                                                                                                                                                                                                          |
