| Product Description        | 3-(Adamantan-1-yl)-1H-pyrazole-5-carbaldehyde, can be used in the synthesis of more complex chemical compounds. Molecular Formula: C <sub>14</sub> H <sub>18</sub> N <sub>2</sub> O Molecular Weight: 230.31 Storage and Stability: Store at -20C. For maximum recovery of product, centrifuge th... |
| Molecular Weight           | 230.31                                                                                                                                                                                                                                                                                               |
