| Product Description        | 5-Amino-1H-indazole-7-carboxylic Acid Methyl Ester can be used in preparation of azabenzimidazoles as AMPA receptor modulators useful in treating diseases. Molecular Formula: C <sub>9</sub> H <sub>9</sub> N <sub>3</sub> O <sub>2</sub> Solubility: Chloroform (Slightly), DMSO (Slightly), Methanol (Slig... |
| Molecular Weight           | 191.19                                                                                                                                                                                                                                                                                                           |
| Form                       | Supplied as a Light Yellow to Yellow Solid                                                                                                                                                                                                                                                                       |
| CAS Number                 | [885272-08-2]                                                                                                                                                                                                                                                                                                    |
