| Product Description        | N-Methyl-N-(2-methylbutyl)-beta-alanine is a useful synthetic intermediate. Molecular Formula: C <sub>9</sub> H <sub>20</sub> ClNO <sub>2</sub> Molecular Weight: 209.71 Storage and Stability: Store at -20C. For maximum recovery of product, centrifuge the original vial prior to removing t... |
| Molecular Weight           | 209.71                                                                                                                                                                                                                                                                                              |
