| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | Purified Aegopodium podagraria (APP) covalently linked to agarose beads (exclusion limit MW 5-15 million). Lectins are derived from the extracts of plants, animals, viruses and microorganisms and are known to agglutinate red blood cells. These agglut... |
| Purity                     | Purified                                                                                                                                                                                                                                                      |
| Form                       | Supplied as a suspension in 0.01M PBS, 0.15M sodium chloride, pH 7.2-7.4, 0.05% sodium azide. Covalently linked to agarose beads (exclusion limit MW 5-15 million).                                                                                           |
