| Product Description        | An Ergosterol Biosynthesis inhibitor. Synonyms: N-(4-Aminobutyl)-5-chloro-2-naphthalenesulfonamide Monohydrochloride, W-13, Sulfacetamide Sodium Monohydrate CAS No: 88519-57-7 Molecular Formula: C <sub>14</sub> H <sub>17</sub> ClN <sub>2</sub> O <sub>2</sub> SHCl Molecular Weight: 349.28 Melting Point... |
| Molecular Weight           | 349.28                                                                                                                                                                                                                                                                                                            |
| CAS Number                 | [88519-57-7]                                                                                                                                                                                                                                                                                                      |
