| Product Description        | 8-Aminoadenine (7H-purine-6,8-diamine) is a ligand for Adenine Receptor with Ki of 0.0341 µM.... |
| Molecular Weight           | 150.14                                                                                           |
| Purity                     | 99.82%                                                                                           |
| CAS Number                 | [28128-33-8]                                                                                     |
| Formula                    | C5H6N6                                                                                           |
| Target                     | AChR                                                                                             |
