| Category                   | Biochemikalien                                                                                                                                                                                                                                                |
| Product Description        | A benzene derivative that increases mutagenic activity in the glutathione transferase mutant (C36). Synonyms: 2-Chloro-1,5-dinitro-3-(trifluoromethyl)benzene, 2-Chloro-3,5-dinitro-alpha,alpha,alpha-trifluorotoluene, 1-Chloro-2,4-dinitro-6-(trifluorom... |
| Molecular Weight           | 270.55                                                                                                                                                                                                                                                        |
| Form                       | Supplied as a pale yellow solid.                                                                                                                                                                                                                              |
| CAS Number                 | [392-95-0]                                                                                                                                                                                                                                                    |
