| Category                   | Biochemikalien                                                                                                                                                                                                                                                |
| Product Description        | A labeled Camptothecin derivative, a topoisomerase inhibitor for cancer therapy. Synonyms: (4S)-4-(Ethyl-d5)-4,9-dihydroxy-1H-pyrano[3,4:6,7]indolizino[1,2-b]quinoline-3,14(4H,12H)-dione (S)-10-Hydroxycamptothecin-d5, Hydroxycamptothecin-d5, NSC 1071... |
| Molecular Weight           | 369.38                                                                                                                                                                                                                                                        |
| CAS Number                 | [1330277-66-1]                                                                                                                                                                                                                                                |
