| Product Description        | N2-Lauroyl-L-glutamine is used as a solubilizing detergent in a novel protein refolding system. N2-Lauroyl-L-glutamine can be synthesized enzymatically in glycerol-water system useing acylase I from pig kidney. Form: White Solid Melting Point: 132-13... |
| Molecular Weight           | 328.45                                                                                                                                                                                                                                                        |
| Form                       | White Solid                                                                                                                                                                                                                                                   |
