| Product Description        | (R)-Mevalonolactone, can be used in the preparation of a vitamin E key intermediate. It can also be used in the synthesis of R-Mevalonic Acid. Synonyms: (R)-4-Hydroxy-4-methyltetrahydro-2H-pyran-2-one CAS No: 19115-49-2 Molecular Formula: C <sub>6</sub> H <sub>10</sub> O <sub>3</sub> Mol... |
| Molecular Weight           | 130.14                                                                                                                                                                                                                                                                                              |
