| Product Description        | TAME is a potent ubiquitin ligase inhibitor that specifically blocks Anaphase-Promoting Complex (APC) activation by directly binding to APC and disrupts the IR-tail-dependent interactions between APC and its activator proteins Cdc20 or Cdh1. It stabi... |
| Molecular Weight           | 378.87                                                                                                                                                                                                                                                        |
