| Product Description        | The human p27Kip1 C-terminus PIM-1 phosphorylation site- (Thr198) containing sequence is synthesized with an N-terminal Arg octamer/R8-containing sequence to facilitate its use as a cell-permeable, substrate-competitive PIM-1 inhibitor. Reported to c... |
| Molecular Weight           | 2820.4                                                                                                                                                                                                                                                        |
| Purity                     | 95% (HPLC)                                                                                                                                                                                                                                                    |
| Form                       | Supplied as a white solid.                                                                                                                                                                                                                                    |
