| Product Description        | Source: Recombinant protein corresponding to aa1-241 from E. coli 30S Ribosomal Protein S2, fused to His-SUMO-Tag at N-terminal and Myc-Tag at C-terminal, expressed in E. coli. Molecular Weight: ~46.7kD Amino Acid Sequence: MATVSMRDMLKAGVHFGHQTRYWNPK... |
| Molecular Weight           | 46.7                                                                                                                                                                                                                                                          |
| UniProt                    | <a href="#">Q1RG21</a>                                                                                                                                                                                                                                        |
| Purity                     | 90% (SDS-PAGE)                                                                                                                                                                                                                                                |
| Form                       | Supplied as a lyophilized powder from 20mM Tris-HCl, 0.5M sodium chloride, pH 8.0, 6% trehalose. Reconstitute with sterile ddH2O to a concentration of 0.1-1mg/ml.                                                                                            |
