| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | EF-1-beta and EF-1-delta stimulate the exchange of GDP bound to EF-1-alpha to GTP. Source: Recombinant protein corresponding to aa1-225 from human EEF1B2, fused to GST-Tag at N-terminal, expressed in E. coli. Molecular Weight: ~51.6kD Amino Acid Sequ... |
| Molecular Weight           | 51.6                                                                                                                                                                                                                                                          |
| UniProt                    | <a href="#">P24534</a>                                                                                                                                                                                                                                        |
| Purity                     | 90% (SDS-PAGE)                                                                                                                                                                                                                                                |
| Form                       | Supplied as a lyophilized powder from 20mM Tris-HCl, 0.5M sodium chloride, pH 8.0, 6% trehalose. Reconstitute with sterile ddH2O to a concentration of 0.1-1mg/ml.                                                                                            |
