| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | May have a function in neuronal differentiation and/or axon growth. Source: Recombinant protein corresponding to aa1-564 from Human Dihydropyrimidinase-related Protein 5, fused to His-tag at N-terminal and fused to Myc-tag at C-terminal, expressed in... |
| Molecular Weight           | 66.4                                                                                                                                                                                                                                                          |
| UniProt                    | <a href="#">Q9BPU6</a>                                                                                                                                                                                                                                        |
| Purity                     | 85% (SDS-PAGE)                                                                                                                                                                                                                                                |
| Form                       | Supplied as a lyophilized powder from 20mM Tris-HCl, 0.5M sodium chloride, pH 8.0, 6% trehalose. Reconstitute with sterile ddH2O to a concentration of 0.1-1mg/ml.                                                                                            |
