| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Application                | ELISA                                                                                                                                                                                                                                                         |
| Product Description        | This antigen is a purified preparation of Dengue 3 virus particles. It is suitable for use in assays for detection of presence of antibodies against Dengue virus, and as a positive control for the presence of the Dengue virus antigens in a sample. Th... |
| Purity                     | Purified from tissue culture supernatant by chromatography. Following the chromatographic purification, the buffer is exchanged for potassium phosphate based buffer, pH 7.2 by dialysis.                                                                     |
| Form                       | Supplied as a liquid in potassium phosphate, pH 7.2.                                                                                                                                                                                                          |
