| Product Description        | 1-Benzyloxycarbonylazetidine-2-carboxylic acid is a useful synthetic intermediate. Molecular Formula: C <sub>12</sub> H <sub>8</sub> D <sub>5</sub> NO <sub>4</sub> Solubility: Dichloromethane Molecular Weight: 240.27 Storage and Stability: Store at -20C. For maximum recovery of product, centrifuge th... |
| Molecular Weight           | 240.27                                                                                                                                                                                                                                                                                                           |
