| Product Description        | (2-Acetamido-5-chlorophenyl)(phenyl)carbamic Acid tert-Butyl Ester is an intermediate in the synthesis of Clobazam (C582500), a benzodiazepine psychotherapeutic agent and anxiolytic agent. Molecular Formula: C <sub>19</sub> H <sub>21</sub> ClN <sub>2</sub> O <sub>3</sub> Solubility: Acetone, DCM, Eth... |
| Molecular Weight           | 360.83                                                                                                                                                                                                                                                                                                           |
| Form                       | Supplied as a Yellow Solid                                                                                                                                                                                                                                                                                       |
