| Product Description        | 2-Ethyl-6-methylaniline is used for the oral toxicity and lipophilicity studies of alkylanilines on rats. Molecular Formula: C <sub>9</sub> H <sub>13</sub> N<br>Molecular Weight: 135.21 Storage and Stability: Store at -20C. For maximum recovery of product, centrifuge the origina... |
| Molecular Weight           | 135.21                                                                                                                                                                                                                                                                                     |
