| Product Description        | 2,5-Dibromonitrobenzene is a halogen-substituted nitrobenzenes used against Tetrahymena pyriformis due to its inhibitory and toxicity activities. Molecular Formula: C <sub>6</sub> H <sub>3</sub> Br <sub>2</sub> NO <sub>2</sub> Molecular Weight: 280.89999999999998 Storage and Stability: Store at -20C.... |
| Molecular Weight           | 280.9                                                                                                                                                                                                                                                                                                            |
