| Product Description        | 3-(2-Amino-2-oxoethyl)-5-methylhexanoic Acid is a Pregabalin (P704800), a GABA analogue used as an anticonvulsant, intermediate. Molecular Formula: C <sub>9</sub> H <sub>17</sub> NO <sub>3</sub> Solubility: DMSO (Slightly), Methanol (Slightly), Water (Slightly) Molecular Weight: 187.24 S... |
| Molecular Weight           | 187.24                                                                                                                                                                                                                                                                                              |
| Form                       | Supplied as a white to off-white solid.                                                                                                                                                                                                                                                             |
