| Product Description        | 3,3-Dimethylglutaric Anhydride acts as a reagent for the synthesis of piscidinol A derivatives and their ability to inhibit HIV-1 protease. Molecular Formula: C <sub>7</sub> H <sub>10</sub> O <sub>3</sub> Molecular Weight: 142.15 Storage and Stability: Store at -20C. For maximum recovery... |
| Molecular Weight           | 142.15                                                                                                                                                                                                                                                                                              |
