| Product Description        | 3,4-Difluoro-2-(trifluoromethyl)-benzenamine is a useful building block in the synthesis of various pharmaceuticals. Molecular Formula: C <sub>7</sub> H <sub>4</sub> F <sub>5</sub> N Molecular Weight: 197.11 Storage and Stability: Store at -20C. For maximum recovery of product, centrifuge... |
| Molecular Weight           | 197.11                                                                                                                                                                                                                                                                                               |
