| Product Description        | 3,5-Dimethoxybenzoic Acid 2-[(1-naphthalenylamino)carbonyl]hydrazide is a potent GPR139 agonist. Molecular Formula: C <sub>20</sub> H <sub>19</sub> N <sub>3</sub> O <sub>4</sub> Molecular Weight: 365.38 Storage and Stability: Store at -20C. For maximum recovery of product, centrifuge the original via... |
| Molecular Weight           | 365.38                                                                                                                                                                                                                                                                                                           |
