| Product Description        | 4-Amino-5-fluoro-1-(alpha-D-ribofuranosyl)-2(1H)-pyrimidinone is an intermediate in the synthesis of Capecitabine (C175650) related compounds. Molecular Formula: C <sub>9</sub> H <sub>12</sub> FN <sub>3</sub> O <sub>4</sub> Molecular Weight: 245.21 Storage and Stability: Store at -20C. For maximum re... |
| Molecular Weight           | 245.21                                                                                                                                                                                                                                                                                                           |
| Form                       | Supplied as a White Solid                                                                                                                                                                                                                                                                                        |
